side and self-splitting Black Forest buffoonery. For over 2,000 years Western philosophy has failed to produce any satisfying answers to interminable metaphysical conundrums -- even Heidegger finally calized this -- Copernicus hasn't. But it's not that simple either, since Copernicus doesn't believe that Copernicus exists. Not likely as epochal a project as his historical astronomer-namesake's, but much more hypocritical and bilanous. Use Copernicus' new release to seduce that significant other who's the center of your maginary universe.
